

# FANCY MOUSE

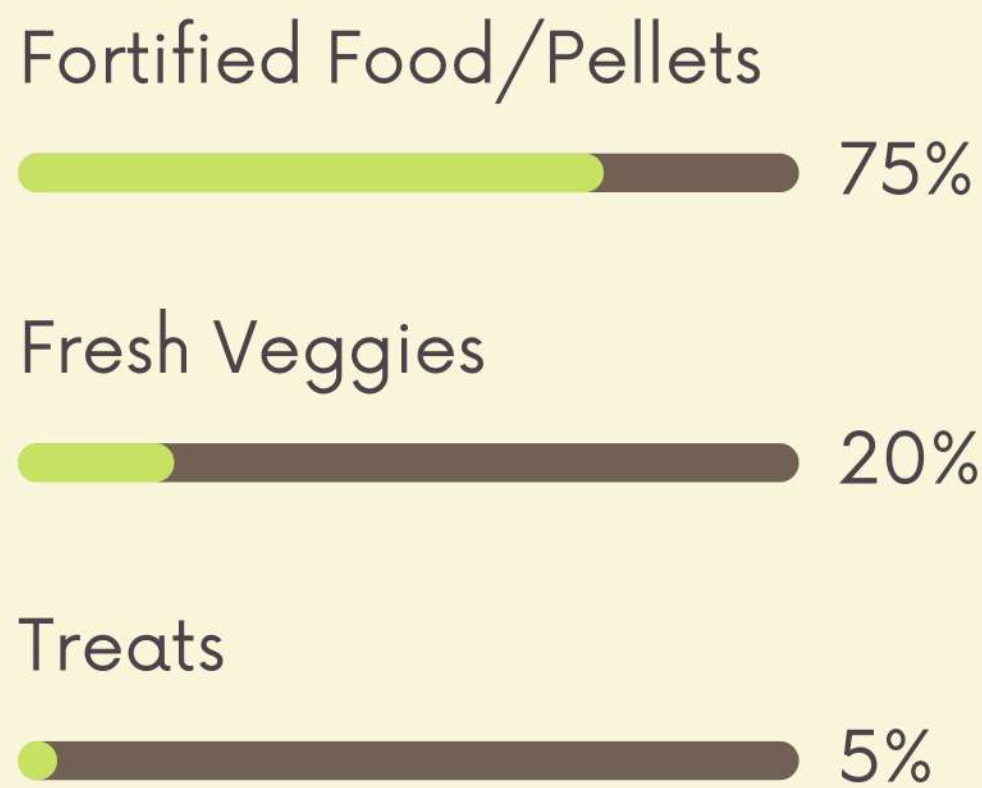

## MUS MUSCULUS DOMESTICA

### INTRODUCTION

Contrary to stigma, domestic mice are clean, social, intelligent and affectionate. They make great pets for first-time pet owners. Mice are nocturnal; sleeping throughout the day and most active in the evening. Due to their social nature, we recommend to get a pair of female mice together, whereas males are typically best kept alone.

### DIET

**CARE LEVEL:** BEGINNER

**LIFESPAN:** 2-4 YEARS

**WEIGHT:** 30G-45G

**BREEDS:** BLACK, BROWN, CREAM, AND MORE!

**FUN FACT:**  
MICE HAVE WEAK EYESIGHT, AND INSTEAD RELY ON THEIR WHISKERS TO HELP GUIDE THEM

### FOOD AND SNACKS

Mice are omnivores, eating both plant and animal foods. Feeding your mouse a formulated pellet is important to avoid selective eating and missing out on important nutrients. Small amounts of mixed food can be used to encourage foraging.

Mice can eat a variety of snacks, as long as given in moderation.

### ENCLOSURE BASICS

Minimum cage size for 2 mice: 20" x 10" x 12"

Mice are active animals in the night and the more space available the better! Mice are best kept in a wire cage to allow for easy climbing and good ventilation. They are excellent escape artists, so ensure that your enclosure is secure. Mice require daily exercise, so having a suitable wheel and places to explore is crucial.
